Method		Sequence IOU Score (%)
Model-1 (Not End2End)	LSTM Hidden Size	
	128	75.0

Table 1: Sequence IOU score between predicted and ground truth bounding boxs, when ground-truth attention mask is used. Trained only on training data and not on extra data.

Method		Sequence Accuracy Predicted Bbox (%)	Sequence Accuracy Ground Bbox (%)
Model-1 (Not End2End)	LSTM Hidden Size		
	128	95.0	96.9

Table 2: Sequence Digit classification accuracy of predicted and ground truth bounding boxs. The classification network was trained using extra data.

1 To Do....

1. Fine-tune the classification network using training data

2. Train the detection part with extra data and fine-tune on the training set

3. Evaluate on the training set

4. Do End-2-End Model
